

Changing Server Password

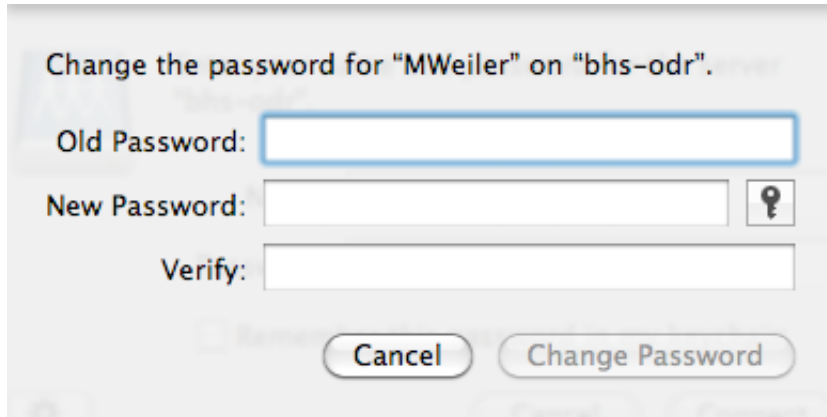

1. At the Finder, select **Go** and select **Connect to Server (⌘K)**. You may need to type in the appropriate server if it not already listed in the favorite Servers window. Press **“Connect”** to continue.

2. Press the gear button icon in the bottom left corner of the window and select **“Change Password”**.

4. Follow the onscreen directions. Click **“Change Password”**.

A screenshot of a macOS-style password change dialog box. The title bar reads "Change the password for 'MWeiler' on 'bhs-odr'". Below the title, there are three text input fields: "Old Password:", "New Password:", and "Verify:". The "New Password:" field has a key icon to its right, indicating a password hint or strength indicator. At the bottom of the dialog, there are two buttons: "Cancel" and "Change Password".

*Note: Remember to never check **remember password in keychain**.*

You have successfully Changed your Password.
